CAVEAT: VCGI doesn't provide support for this procedure. Use it at your own risk.

1. Set Chrome settings to download to a particular folder and to not ask where to save each file.

2. Install **Batch Link Downloader** extension for Chrome.
3. Navigate to the web folder that contains the files to be downloaded.
4. Click the **Batch Link Downloader** button.

5. Enter *.* and click **Add by filename pattern** to select all. Deselect unwanted items—such as a link to the parent directory.
